

Fitness Activity Recognition

Demo 8
6/17/2022

Brady Hong, Alqama Sams, Ahmed Ceif, Devansh Sharma, Sarthak Gupta
headed by Mike Chung

Work for this week

- Implemented RepNet to record repetition counts for **multiple exercises** in particular video
- Started writing a draft for paper publication
- Developed meaningful metrics

ExtraTrees

Classifier Feature Importance:

- Our feature vector consists of 198 features
- First 99 are 3D coordinates
- Rest are created from feature engineering
- Masking
- Momentum
- This graph shows the 40 most important features.

Features created from feature engineering step are most relevant!

Goals for Next Week

- Finish publication results
- Automate the functionality
- Refactor new code into current setup
- Engagement Metric
 - Get Data from Youtube ex: Videos with relevant exercises with ratings
 - Train a regressor to produce score
